## About Me

---

Developer Relations Engineer with 2.5+ years of experience in blockchain development, community engagement, and technical education. Skilled in creating reference applications, leading workshops, managing hackathons (13K+ participants), and supporting developer onboarding.

Proficient in **Solidity, SmartPy, Move, and Etherlink**, I have developed developer tools, tutorials, and API documentation, actively assisting developers via GitHub, Discord, and social channels. My experience includes collaborating with engineering teams, resolving technical issues, and streamlining adoption strategies.

## Skills

---

- **Languages:** Solidity, Python, SmartPy, JavaScript, Java, C++, HTML, CSS
- **Frameworks:** React.js, Node.js, Taquito.js, web3.js
- **Blockchain Development:** Thirdweb, OpenZeppelin, Hardhat, Remix
- **Technical Content Creation:** Blogs, youtube tutorials, workshops, developer handbooks, reference applications
- **Community Building:** Hackathons, fellowships, meetups, workshops, ecosystem growth

## Experience

---

**Lead Developer Relations** [Tezos India](#) *Remote, India* **Oct 2022 - PRESENT**

- **Expanded the Tezos developer community** to **15,000+** members, delivering **150+** workshops, hackathons, and mentorship programs on SmartPy (Tezos L1), Solidity (Etherlink L2), and full-stack dApp development.
- **Designed** and implemented **developer onboarding pipelines**, including **TezConnects**, **TezDay**, and bounties, onboarding **3,000+** developers into the Tezos ecosystem.
- Led **TezAsia 3.0**, a premier Tezos hackathon with **13,000+** registrations and **1,000+** project submissions, mentoring developers, curating challenges, and ensuring a seamless experience.
- Developed **TezIndia Buildercamps**, a 10-week blockchain **cohort training** 60+ developers annually, with a 75% graduation rate.
- Partnered with the **University of the Philippines** to deliver an **official blockchain course** to a batch of 72 students, bridging academia and industry.
- Represented Tezos at Web3Conf India, GDG DevFests, and other industry conferences, strengthening Tezos' presence in the Indian Web3 space.
- Launched **Tezos Guilds**, city-based developer hubs onboarding **EVM developers** through **Etherlink L2**, conducting workshops in multiple cities to foster local communities and accelerate adoption
- Here's a **playlist** of my 17 online [recorded sessions](#)

**Founder** [Web3Panjab](#) *Delhi, Chandigarh, India* **July 2022 - Present**

- Scaled **Web3Panjab** from a small local initiative to a thriving blockchain community, growing from 20 to 300+ active members with 2,000+ in the mailing list.
- Organized **30+ blockchain events**, collaborating with CoinDCX, StarkNet, Solana, Aptos, and other industry leaders to expand blockchain adoption
- **Forged strategic partnerships** with global Web3 conferences, including **ETH Toronto**, **Token2049**, and WebX ASIA 2024, serving as a **Media and Community Partner** to enhance visibility.
- Partnered with **6 regional blockchain companies**, including **Antier Solutions** and **Seasia Infotech**, and collaborated with **4 universities** to deliver **blockchain education**, industrial visits, and hands-on training programs for students.
- Started with a **developer focused youtube series** to teach, test and try tools and new blockchain networks, we have [Sui based workshop series](#) on youtube.

## Projects

---

### [Gitfund](#)

- An initiative to automate payments for GitHub contributors, fostering a more engaged open-source ecosystem through blockchain-based rewards.
- **Seamless GitHub Integration:** Tracks pull requests and merges, ensuring transparent contribution validation.
- **Smart Contract-Based Payments:** Automatically distributes rewards to contributors upon successful merge.
- **Flexible Payment Models:** Enables personal and organizational repository owners to define and configure custom payment rules.
- **Driving Open-Source Adoption:** Streamlines compensation for developers, encouraging sustained contributions and project growth.

**BullStreet.fun** : *pump.fun for EVM ecosystem. Submission of Eth Tokyo'24*

- Vision: Built a community-focused **launchpad** for diverse use cases beyond memecoins, emphasizing utility through assets, content, and NFTs.
- Innovation: Enabled **interchain asset transfers**, unifying Ethereum-based communities into a seamless, collaborative ecosystem.

### **ScrapGrab**

- Automated Geolocation Extraction: Extracts restaurant locations from a given area and stores data in a structured CSV format.
- Innovative Approach: Overcame the challenge of missing direct GPS coordinates by calculating distances from given locations. Developed using Python and Selenium, showcasing expertise in automation and data extraction

### **Education**

---

• **B.Tech in CSE ( 8.5 CGPA )**

**Indraprastha University**

*DELHI, India*

**AUG 2018 - AUG 2022**
