About Me

Frontend developer and technical educator with 3 years of experience in technical education, developer onboarding, and developer-focused solutioning. Demonstrated ability to lead hands-on technical workshops, build proof-of-concepts, reusable components and explain complex technical ideas to both engineering and business stakeholders. Experienced in handling technical conversations and driving developer adoption across ecosystems.

Skills

- **Languages:** Java, C++,Solidity, JavaScript, Python (web scraping, Python-based Tezos smart contracts , image processing)
- **Frameworks:** React.js, Taquito.js, Web3.js, REST APIs,
- **Development Tools:** Thirdweb, Remix, v0 (Vercel), Cursor, Claude, exploring AI agent frameworks, LLM APIs
- **Enablement & Education:** Technical Workshops, Live Training, Certification Design, Hackathon Mentoring, Developer Onboarding, POC Development

Education

- | | | | |
|---|---|--------------|---------------------|
| • Bachelors of Technology in CSE | Indraprastha University | DELHI, India | AUG 2018 - AUG 2022 |
|---|---|--------------|---------------------|

Experience

- | | | | |
|---|----------------------------|---------------|----------------------|
| • Founder & Independent Consultant - | Web3Panjab | Remote, India | April 2025 - Present |
|---|----------------------------|---------------|----------------------|

- **Shipped** two production frontend **products** for paying clients - [SuiSips](#) and [YinYang](#)(v1) - using AI-assisted development workflows (v0, Cursor, Claude).— while hosting developer events for Web3 companies.
- **Generated \$9K** revenue (**44% profitable**) across both streams in 8 months.
- Planning and executing a **50-event** Pan **India** developer networking **event** (May 2026, **\$20K+** USD budget) as **lead host** and program manager, earning **20%** of total budget.

- | | | | |
|-----------------------------------|-----------------------------|---------------|-----------------------|
| • Lead Developer Relations | Tezos India | Remote, India | Oct 2022 - March 2025 |
|-----------------------------------|-----------------------------|---------------|-----------------------|

- Owned developer relations for [Tezos L1](#) and was subsequently entrusted to **lead Developer Advocacy for [Etherlink \(EVM L2\)](#)** - another product under **Tezos**, in **India** (Consulting Expansion) expanding responsibility across onboarding, ecosystem programs, and technical enablement.
- Led flagship enablement programs (**TezConnect, TezDay, Buildercamps**), designed certification-style learning tracks, architecture reviews, and live POC demos for startups, universities, and **80+** hackathon partners; co-created blockchain curriculum with the **University of the Philippines**.
- Built **production-grade dApps** and **reusable** frontend **templates** using **React, Ethers.js, Solidity**, and **SmartPy** (**Python-based Tezos** smart contract language) , **reusable UI templates** for SDK demos , demonstrating EVM compatibility, wallet authentication, and contract interaction patterns for developer onboarding.
- Designed and delivered **hands-on developer education**, mentoring 1,000+ builders through structured workshops, frontend-to-contract workflows, and real-world dApp patterns.
- Collaborated with **wallet, explorer, and protocol teams** to improve SDK usability — collected **developer feedback** to ship product improvements (Naan Wallet, **24% activation lift**) and contributed to [open-source](#) starter kits and [public content](#) that **increased** new project creation by **15%**.

Projects

[SuiSips](#): Production SIP tracking and community platform for the Sui ecosystem. *Technologies: Next.js, React Markdown, Tailwind CSS* .

[Miden SDK Simulator](#): Interactive frontend built to demonstrate anonymous voting workflows on Miden (Polygon's ZK rollup SDK). Created as a rapid SDK onboarding exercise - scoped, built, and shipped with no prior Miden experience, to show how any new SDK can be made learnable through a working demo. *Technologies : React · Miden SDK · Vercel · Cursor*

[JSON API visualiser](#): Developer tool to fetch and visualise any public REST API response as an interactive graph and tree. *Technologies : Next.js · Tailwind CSS · Vercel · v0*
